- ✓ Data Integrity
- ✓ Audits & Assessments

Choose from a comprehensive selection of services or let us assist with every aspect of compliance and validation.

Environmental Sustainability Compliance

Micronova and sister company, Industrial Compliance Services (ICS) are committed to assisting our customers in meeting their initiatives in reducing waste going in landfills and with environmental compliance.

Reduce waste going to the landfills by **repurposing** your used Micronova mops into various materials for a second life as fillers for furniture. Alternatively, participate in our **Waste to Energy (WTE)** Programs which in some cases may be a better solution than repurposing.

Environmental Compliance Services:

- ✓ Regulated waste management
- ✓ Air quality services
- ✓ Stormwater management
- ✓ Chemical management

Micronova® / ICS

Irradiation and Kitting Services

Sterile products are often required in critical processing areas. Micronova's cleanroom product packaging and gamma irradiation processing allows them to offer similar processes as services to their customers. In some cases the material sent through the packaging irradiation is customer owned, other times, Micronova will supply the specific raw material the customer needs irradiated.
