Critical Cleaning in Compounding Pharmacies

Cleaning is critical in compounding and sterile pharmacies whether falling under USP 795, 797, or USP 800 guidelines. Cleaning will vary for hoods, buffer zone, or anterooms, yet in each case it is important to consider fabric options, hardware durability, and the right tools for the application. At Micronova, we understand the necessity of meeting strict production requirements with the highest level of control.

NovaClean®

A neutral Biodegradable cleaning detergent is excellent for residue buildup removal and debris before and after disinfectant is applied to surfaces.

NC1-G

Buffer Room & Anteroom Cleaning

Selecting a low particulating mop cover and cleaning tools that support proper technique is the basis for an efficient cleaning protocol. Multi surface flat head mops simplify cleaning and are an economical, versatile, choice for pharmacy room cleaning. A modular, compact, and light- weight cart and wringer system is important from an ergonomic standpoint for technicians, but is also vital if storage is limited. .

NovaSnap™

The snap on and release function for this polyester mop head produces a simple lightweight system.

BSC Hood and Work Center Cleaning

Safe and ergonomic cleaning

Cleaning in BSC, powder containment hoods, RABS, Workstations and other hard to reach areas present a variety of challenges. Micronova's specialty cleaning tools and covers provide options to increase effectiveness, reduce time, and enhance ergonomics.

1 Isolator Tool™

Hoods, RABS, and Workstations

This extended reach tool facilitates safe and easy cleaning inside hoods.

2 Double CornerCleaner Mop

Pass-throughs, BSC hoods, chambers, and small spaces

This diamond-shaped tool is ideal for cleaning equipment and awkward small spaces with deep corners.

3 MegaSwat™ Mop

Freezers, Centrifuges, Balances, Incubators

This tool has a flexible blade that is excellent for cleaning any narrow space under, around, in between or above equipment.

4 PolyMitt™ Cleaning Mitt Wipe

Shelves, Equipment, Carts, Wire racks, Door knobs, Chairs

This mitt is ideal for cleaning unique shaped surfaces as it conforms to your hand and allows for more ergonomic cleaning than a traditional wipe.

Disposal and Removal for Waste

FDA compliant LDPE liners and bags

Compounding Pharmacies must establish SOPs for transport and disposal of all hazardous drugs, addressing the prevention of accidental exposures, spills and contamination.

BinLiners™

Liners are available in various configurations and are used for:

- transfer raw material
- product storage
- garment collection
- material disposal

Pictured to the right is a stainless steel binstand used with liners

Biohazard Bags

Gamma Irradiated Biohazard bags are ideal for disposal of:

- pipettes
- swabs
- rodac plate test samples
- medical and infectious waste
- hazardous drugs

Hand Hygiene *Touch Free Sanitation*

The act of removing viruses/bacteria or other unwanted substance from your hands is simple with Micronova's soaps and sanitizers

Good Documentation

Cleanroom Pens and Markers

Good documentation practices are imperative. Scan code for pen options from irradiated indelible ink pens to smear resistant markers.
